

TOP-Splice

ESD Safe Tape Connectors in 3 sizes
for 8 mm, 12 mm and 16 mm SMD Tapes

- Patent applied for -

Application to Cover Tape

- on tool -

- without tool -

Advantages:

- more cost effective than previous SMD Tape Connectors
- secure adhesion to Cover Tape
- fine micro perforation ensures clean separation from carrier material
- suitable for all splice tool systems
- no tool required for application of TOP-Splice

Method:

- 1.) remove narrow paper strip from back; the printed, wide carrier strip remains firmly attached to the TOP-Splice and serves as a 'handle' right to the end of the splicing process
- 2.) carefully apply the Tape Connector firmly to the Cover Tape (ensuring that the joint up component tape is no longer retrained in the Splice Tool)
- 3.) finally tear off the 'handle' along the fine micro perforation and discard

Details:

Order No: 3.8643.00 (for 8 mm)
 Size: 4,3 x 40 mm (for 8 mm)
 Unit: 1,500 / Carton
