

NEW FM2032 – Micro Soldering Iron kit

The Hakko FM2032-52 Micro Soldering Iron kit consist of a slender, light-weight hand piece that extends precision micro soldering capabilities to a variety of Hakko soldering and rework systems.

The FM-2032 ESD-safe soldering iron uses the quick change T30 Series composite micro soldering tips engineered for optimal heat transfer and the ability to reach into tight areas.

Features

- Connects to FX951, FM203 & FM206 stations
- Compatible with T30 series micro tips
- Temperature range 200° - 450°C
- Light weight handle with cool running grip
- Burn resistant cord
- ESD safe

Included with the FM2032-52 Micro Soldering Iron Conversion Kit:

- 1 - FM2032-51 Hand piece only
- 1 - B3253 Connecting cable
- 1 - FH200-81 Iron holder
- 1 - B2300 Heat resistant pad

Note: No tips supplied with kit

NEW FM2032 – Micro Soldering Iron kit

Specification

Model Name	FM2032
Part Number- Kit	FM2032-52
Power Consumption	48W
Tip-to-Ground Potential	< 2mV
Tip-to-Ground Resistance	< 2 ohms
Total Length with tip, w/o cord	170 mm
Length of cord	1.2 m

Optional tips

P/N	Description
T30-D06	Soldering tip shape 0.6D
T30-D1	Soldering tip shape 1D
T30-I	Soldering tip shape I
T30-J	Soldering tip shape J
T30-KU	Soldering tip shape KU
T30-KN	Soldering tip shape KN
